

Dear Incoming Advanced Research 12 Student:

Your schedule for the 2021-2022 school year indicates that you have elected to take Advanced Research 12 (9684/9694/9774) next year. We are delighted that you have decided to continue in the Research Program. Twelfth grade is a very important year in your high school career; especially first semester. To enable you to have a head start, there is a summer activity which consists of three parts:

1. [The Regeneron Science Talent Search](#)
 - a. [Start the application](#)
 - b. [Essays Questions](#) 3, 4, 6, 7 and 8 (none are specifically related to project completion)
2. A print out of the ISEF Rules Wizard, as it pertains to your project. All Regeneron ISEF forms that require **prior** approval associated with your project (critical if you are working at a regulated research institution)
[ISEF Rules Wizard](#)
[ISEF Forms](#)
3. Write an 20-page research paper following the [Regeneron STS format](#).

All three assignments are due on the first day of research, Tuesday, September 1, 2021.

In addition, please join our Google Classroom, class code: je45t6m

All materials relating to rules, and above assignments are already posted on the Google Classroom, code provided above.

Lastly, we do expect you to familiarize yourself with competition rules, as they pertain to your project, for both [Regeneron STS](#) and [Regeneron ISEF](#).

We are all aware that we are navigating uncharted waters, and are operating under past precedents for various competitions, and are trying to prepare you the best we can. If you have any questions with regard to the course or summer assignment please reach out to your team of Advanced Research 12 teachers:

Mrs. Ade (vade@syossetschools.org)

Mr. Manzo (amanzo@syossetschools.org)

Mrs. Levin (nlevin@syossetschools.org)

Mrs. Malley (dmalley@syossetschools.org)

Have a wonderful summer,

Mrs. Veronica Ade
